02.4 Monochrome

Monochrome is using a single color throughout the whole logo design. It does not contain any other effects, shadows or shades other than the single color selected.

Logos are sometimes used in non-conventional ways like laser engravings, embroidery, 3d printing, textile printing. All of these products use special machines that don't support ordinary colored files. This is where monochrome (black and white) formats come into play.

03.1 Logomark

The logomark for Bantu College aims to be synonymous with legacy & excellence. The brandmark exudes old heritage, like that of an Institution, but with very modern tones.

It is heraldic in the old English vein but very clearly rooted in African themes - Bantu, itself harks back to old Jeli-african traditions of oral history.

04.4 Safe Space

The safe zone is a required amount of space that needs to exist around the logo or symbols in order to ensure legibility. The zone defines the minimum spacing distance from the page edge, object, text, or image.

To determine if the safe zone has been accurately implemented, estimate the height of the letter “B” on all sides. See image for clarification.
